## Lesson Plan

| Name of Faculty       | : Ms Madhu Madhan         |
|-----------------------|---------------------------|
| Discipline            | : Computer Engg           |
| Semester              | : 4 <sup>TH</sup>         |
| Subject               | : Data Structure Using C  |
| Lesson Plan Duration  | : 16 Weeks                |
| Work Load (Lec./Prac) | : Lecture -3 Practical- 6 |

| Week            | Theory                             |  | Practical   |   |  |
|-----------------|------------------------------------|--|-------------|---|--|
|                 | Lecture<br>Day                     | Topic<br>(including assignment/test)   | Pra.<br>Day | Торіс   |  |
| 1 <sup>st</sup> | 1 <sup>st</sup>                    | Problem solving concept, top down and bottom updesign                        | 1           | The factorial of a given number usingrecursion        |  |
|                 | 2 <sup>nd</sup>                    | structured programming Concept of data<br>types, variables and constants     |             |   |  |
|                 | 3 <sup>rd</sup>                    | Concept of pointer variables and<br>constants,Introduction to data Structure | 2           | The factorial of a given<br>number using<br>recursion |  |
| 2 <sup>nd</sup> | 4 <sup>th</sup>                    | Array, Linked List, Stack,   | 3           | Inserting elementsin array                            |  |
|                 | 5 <sup>th</sup>                    | Queue, Trees, graphs<br>Revision   | 4           | Inserting elements in array                           |  |
| 3 <sup>rd</sup> | 7 <sup>th</sup><br>8 <sup>th</sup> | Concept of Arrays,<br>Single dimensional array                               | 5           | deleting elementsin array                             |  |
|                 | 9 <sup>th</sup>                    | Two dimensional array  | 6           | deleting elements inarray                             |  |
| 4 <sup>th</sup> | 10 <sup>th</sup>                   | Representation of Two dimensional<br>Array(Base Address, LB, UB)             | 7           | The addition of twomatrices<br>using<br>functions     |  |

|                 | $11^{\text{th}}$ | searching,  |    |   |
|-----------------|------------------|---|----|---|
|                 |                  |   |    |   |
|                 | 12 <sup>th</sup> | traversing, ,   | 8  | The addition of two<br>matrices using<br>functions  |
| 5 <sup>th</sup> | 13 <sup>th</sup> | Inserting   | 9  | Insertion of elementsin<br>linked list  |
|                 |                  | Inserting   | _  |   |
|                 | 14 <sup>th</sup> |   |    |   |
|                 | 15 <sup>th</sup> | deleting  | 10 | Deletion of elements<br>in linked list  |
| 6 <sup>th</sup> | 16 <sup>th</sup> | Revision  | 11 | Insertion of elementsin<br>doubly linked list   |
|                 | 17 <sup>th</sup> | Test  | _  | Deletion of elementsin<br>doubly linked list  |
|                 | 18 <sup>th</sup> | Introduction to linked list and doublelinked list<br>Representation of linked lists in Memory | 12 | Insertion of elementsin<br>doubly linked list<br>Deletion of elementsin<br>doubly linked list |
| 7 <sup>th</sup> | 19 <sup>th</sup> | Comparison between Linked Listand Array<br>Traversing alinked list Searching linked list      | 13 | Viva-Voce   |
|                 | 20 <sup>th</sup> | Insertion, deletion into linked list (At first Node,<br>Specified Position, Last)             | 14 | Viva-Voce   |
|                 | 21 <sup>st</sup> | Application of linked lists   |    |   |
| 8 <sup>th</sup> | 22 <sup>nd</sup> | Doubly linked lists   | 15 | Push and pop operation in stack   |
|                 | 23 <sup>rd</sup> | Traversing a doubly linked lists  |    | Push and pop operation in stack   |
|                 |                  |   |    |   |

|                  | 24th                   | Insertion and deletion into doubly linked lists   | 16  | Conversion from in-fix   |
|------------------|------------------------|---|-----|--|
| oth              |                        |   | 1.5 | notation   |
| 9 <sup>th</sup>  | 25 <sup>th</sup>       | Introduction to stacks, Representation of stacks with arrayand Linked List  | 17  | Conversion from in-<br>fix notation  |
|                  | 26 <sup>th</sup>       | Implementation of stacks  | 18  | Insertion and  |
|                  | 27 <sup>th</sup>       | Application of stacks: Polish Notations   |     | Deletion of elements<br>in queue using<br>pointers                         |
| 10 <sup>th</sup> | $28^{\text{th}}$       | Converting Infix to Post Fix Notation   | 19  |  |
|                  | 29 <sup>th</sup>       | Test  |     | Insertion and<br>Deletion of elements<br>in queue using<br>pointers        |
|                  | 30 <sup>th</sup>       | Evaluation of Post Fix Notation, Tower of Hanoi<br>Recursion: Concept and Comparison between<br>recursion and Iteration | 20  | Insertion of elementsin<br>circular queue using<br>pointer                 |
| 11 <sup>th</sup> | 31 <sup>st</sup>       | Introduction to queues, Implementation of<br>queues<br>using array algorithm  | 21  | Deletion of elements   |
|                  | 32 <sup>nd</sup>       | Implementation of queues using Linked List with algorithm   |     | in circular queue<br>using pointers  |
|                  | 33 <sup>rd</sup>       | Circular Queues, De-queues  | 22  | Traversing of tree   |
| 12 <sup>th</sup> | 34 <sup>th</sup>       | Concept of Binary Trees, Concept of   | 23  |  |
| 12               | 35 <sup>th</sup>       | representation of Binary Tree<br>Concept of balanced Binary Tree  | 23  | Traversing of tree   |
|                  | 36 <sup>th</sup>       | Traversing Binary Trees (Pre order, Post order and<br>In<br>order)  | 24  | The linear search<br>procedures to searchan<br>element in given list       |
| 13 <sup>th</sup> | 37 <sup>th</sup>       | Searching,  | 25  |  |
| 15               | 38 <sup>th</sup>       | inserting in binary search trees, deleting in binary<br>search trees  |     | The binary search<br>procedures to search<br>an element in a given<br>list |
|                  | 39 <sup>th</sup>       | Linear Search algorithm, Binary Search algorithm  | 26  | The bubble sort<br>techniques  |
| 14 <sup>th</sup> | $40^{\text{th}}$       | Concept of sorting , Bubble Sort  | 27  |  |
|                  | 40<br>41 <sup>st</sup> | Insertion Sort  | /   | The selection sorttechniques   |
|                  | 42 <sup>nd</sup>       | Selection Sort  | 28  | Viva voce  |
| 15 <sup>th</sup> | 43th                   | Merge Sort, Radix Sort  | 29  |  |
|                  | 44th                   | Heap Sort   |     | Viva voce  |
|                  | 45th                   | Test  | 30  | Revision   |
| 16th             | 46th                   | Revision  |     | Revision   |
|                  | 47th                   | Revision  |     | Revision   |
|                  | 48th                   | Revision  |     |  |
