## **Lesson Plan**

Name of the Faculty : Sh. VIJAY DAHIYA Discipline : Mechanical Engg.

Semester : 5<sup>th</sup> Subject : W.T-III

Lesson plan duration: 15 weeks (from September, 2023 to December, 2023)

| Week   | Theory   |  |  |  |  |
|--------|--|--|--|--|--|
|        | Lecture Day Topic (including assignments /tests) |  |  |  |  |
| Week 1 | 1 <sup>st</sup>                                  | Milling- Specification and working principle of milling machine  |  |  |  |
|        | 2 <sup>nd</sup>                                  | Classification, brief description and applications of milling machine  |  |  |  |
|        | 3 <sup>rd</sup>                                  | Main parts of column and knee type milling machine   |  |  |  |
| Week 2 | 1 <sup>st</sup>                                  | Milling machine accessories and attachment – Arbors, adaptors, collets, vices, circular table, indexing head and tail stock, vertical milling attachment |  |  |  |
|        | 2 <sup>nd</sup>                                  | Milling methods - up milling and down milling  |  |  |  |
|        | 3 <sup>rd</sup>                                  | Identification of different milling cutters and work mandrels  |  |  |  |
| Week 3 | 1 <sup>st</sup>                                  | Work holding devices   |  |  |  |
|        | 2 <sup>nd</sup>                                  | Milling operations – face milling, angular milling, form milling,  |  |  |  |
|        | 3 <sup>rd</sup>                                  | form milling, straddle milling, gang milling   |  |  |  |
| Week 4 | 1 <sup>st</sup>                                  | Cutting parameters Indexing on dividing heads, plain and universal dividing heads.   |  |  |  |
|        | 2 <sup>nd</sup>                                  | Indexing methods: direct, Plain or simple, compound,   |  |  |  |
|        | 3 <sup>rd</sup>                                  | differential and angular indexing.   |  |  |  |
| Week 5 | 1 <sup>st</sup>                                  | numerical problems on indexing   |  |  |  |
|        | 2 <sup>nd</sup>                                  | Revision   |  |  |  |
|        | 3 <sup>rd</sup>                                  | Mock Test  |  |  |  |
| Week 6 | 1 <sup>st</sup>                                  | Gear Manufacturing and Finishing Processes- Gear hobbing   |  |  |  |
|        | 2 <sup>nd</sup>                                  | Gear shaping , Gear finishing processes  |  |  |  |
|        | 3 <sup>rd</sup>                                  | Grinding- Purpose of grinding  |  |  |  |
| Week 7 | 1 <sup>st</sup>                                  | Various elements of grinding wheel – Abrasive, Grade, structure, Bond  |  |  |  |
|        | 2 <sup>nd</sup>                                  | Common wheel shapes and types of wheel – built up wheels, mounted wheels   |  |  |  |
|        | 3 <sup>rd</sup>                                  | Diamond wheels. Specification of grinding wheels as per BIS  |  |  |  |
| Week 8 | 1 <sup>st</sup>                                  | Truing, dressing, balancing and mounting of wheel.   |  |  |  |
|        | 2 <sup>nd</sup>                                  | Grinding methods – Surface grinding,   |  |  |  |
|        | 3 <sup>rd</sup>                                  | Cylindrical grinding and centreless grinding.  |  |  |  |
| Week 9 | 1 <sup>st</sup>                                  | Grinding machine – Cylindrical grinder, surface grinder,   |  |  |  |

|         | 2 <sup>nd</sup> | Internal grinder, centreless grinder, tool and cutter grinder.  |  |  |  |
|---------|-----------------|---|--|--|--|
|         | 3 <sup>rd</sup> | Selection of grinding wheel   |  |  |  |
| Week 10 | 1 <sup>st</sup> | Assignment  |  |  |  |
|         | 2nd             | Modern Machining Processes- Mechanical Process - Ultrasonic machining (USM): Introduction, principle, process, advantages and limitations, applications |  |  |  |
|         | 3rd             | Electro Chemical Processes - Electro chemical machining (ECM) – Fundamental principle, process, applications,   |  |  |  |
| Week 11 | 1st             | Electro chemical Grinding (ECG) – Fundamental principle, process, application   |  |  |  |
|         | 2nd             | Electrical Discharge Machining (EDM) - Introduction, basic EDM circuit,   |  |  |  |
|         | 3rd             | EDM Principle, metal removing rate, dielectric fluid, applications  |  |  |  |
| Week 12 | 1st             | Laser beam machining (LBM) – Introduction, machining process and applications   |  |  |  |
|         | 2nd             | Electro beam machining (EBM)- Introduction, principle, process and applications   |  |  |  |
|         | 3rd             | Revision  |  |  |  |
| Week 13 | 1st             | Metallic Coating Processes- Metal spraying – Wire process, powder process, applications   |  |  |  |
|         | 2nd             | Powder coating  |  |  |  |
|         | 3rd             | Metal Finishing Processes- Purpose of finishing surfaces.   |  |  |  |
| Week 14 | 1st             | Surface roughness-Definition and units  |  |  |  |
|         | 2nd             | Honing Process, its applications  |  |  |  |
|         | 3rd             | Description of hones  |  |  |  |
| Week 15 | 1st             | Brief idea of honing machines. Lapping process, its applications.  Description of lapping compounds and tools.  |  |  |  |
|         | 2nd             | Brief idea of lapping machines.   |  |  |  |
|         | 3rd             | Super finishing process, its applications. Polishing Buffing  |  |  |  |
